

Java

```
class Solution {  
    public long minimumTime(int[] time, int totalTrips) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} time  
 * @param {number} totalTrips  
 * @return {number}  
 */  
var minimumTime = function(time, totalTrips) {  
  
};
```

C++

```
class Solution {  
public:  
    long long minimumTime(vector<int>& time, int totalTrips) {  
  
    }  
};
```
